Information for Contributors

DEVELOPMENTAL PSYCHOBIOLOGY will promptly publish papers dealing with physiological, behavioral, or genetic studies of the developing organism. These may include research reports, theoretical treatises, notes on apparatus or methodology, and monograph supplements. In addition, the Journal will carry letters to the editors, announcements of general interest to our readers, and book notices.

Materials should be sent directly to the Editor-in-Chief, Dr. Gilbert W. Meier, Meyer Children's Rehabilitation Institute, University of Nebraska Medical Center, 444 South 44th Street, Omaha, Nebraska 68131, U.S.A., or your nearest Regional Editor. Publication is anticipated in six months or less after acceptance. Papers must not be submitted simultaneously to, or have been previously published in another journal except as an abstract or brief, preliminary report.

Authors should follow a clear, concise style. Articles should be typewritten on one side of 8½ x 11 inch (22 x 28 cm) paper of good quality, double-spaced throughout, have a wide margin all around, and be submitted in three copies (ribbon plus first two carbon copies) complete with tables and illustrations. All pages should be numbered serially beginning with the title page.

Research reports should be subdivided into the following sections: *Synopsis* (no heading required), *Introduction* (no heading required), *Method*, *Results*, *Discussion*, *Notes* (if applicable), *References*.

Language: English will be the language of publication.

Title: The title should be typed on page 1 of the manuscript together with author(s); laboratory or department and institution of origin; city, state, country; complete address for receiving proofs and reprint requests. Names of authors should be positioned vertically and grouped to avoid repeating an affiliation. If desired, additional affiliations or present addresses of authors may be stated in the *Notes* section. A short, running title of not more than 50 characters (including spaces) suitable for alternate page headings should be typed on page 2 of the manuscript, if the full title exceeds this limitation.

Synopsis: The synopsis should adequately summarize the paper in no more than 150 words and be typed on page 3 with a list of up to 12 words or phrases suitable for indexing purposes.

Notes: This section will include all material that otherwise would appear as footnotes, with the exception of the date the manuscript is received at the editorial office and table footnotes. *Notes* should be typed

on a separate page following the *Discussion* section. If they relate to the title or the authors, *Notes* should not have superscripts. Text footnotes should be numbered consecutively throughout the paper with superscripts in Arabic numerals. Table footnotes should be lettered consecutively within each table with superscripts in lower case Roman.

References: Authors cited in the text should be indicated by family name followed by year of publication (e.g., Hilton, 1967). When a reference has more than two authors, all the names should be used in the first citation, and on subsequent citation thus: (Hilton *et al.*, 1967). Where more than one paper by the same author(s) have appeared in one year, the convention will be: (Hilton, 1967a,b). Journal title abbreviations listed in *Index Medicus* should be used.

Form for journal reference: Alexander, G. J., Miles, B. E., Gold, G. M., and Alexander, Rita B. (1967). LSD: Injection early in pregnancy produces abnormalities in offspring of rats. *Science*, 157:459-460.

Form for chapter reference: Meier, G. W. (1968). In search of the engram: In the nursery. In G. Newton and S. Levine (Eds.), *Early Experience and Behavior*. Springfield: Thomas. Pp. 338-364.

Units of Measurement and Symbols: Examples: 5 µg 2 g 9 ml 8% "I. Units of measurement are abbreviated and unpunctuated when used with numerals.

Illustrations: These should be identified on the back lightly in pencil with number and author's name, indicating "top." Prints of figures should be sharp, clear, and glossy. Half-tones should be glossy, strongly contrasted prints. Captions should be typed on a separate sheet at the end of the manuscript. Indicate approximate point of insertion in the text.

Magnification of photomicrographs should be stated together with dimensional scale.

Tables: Each table should be typed on a separate sheet, indicating approximate point of insertion in the text.

Proofs: Printer's errors should be indicated marginally on the proofs. Other changes on the proofs may be charged to the author.

Reprints: The author will receive with his galley proofs a reprint order form which must be completed and returned with the proofs. Senior authors will receive 50 reprints of their articles without charge.
